Personality + Career

Building Construction Technology students like to start projects and see them through to completion - they like seeing the f nished result and the ef orts of their work. They also see the big picture, are self-motivated, driven, and enjoy physically demanding tasks

ast

The construction industry is growing, and a degree in Building Construction Technology from SCC will equip you with the skills to succeed in a diverse field. Students learn important construction theory and receive comprehensive training and skills on real projects in carpentry and cabinet making, residential and commercial construction, concrete and masonry construction, and gain drafting and estimating skills.

The program teaches students the necessary information to work in both the residential and commercial industries. There is a big demand for skilled workers in the construction industry, and the career opportunities and earning potential are limitless!
